the smart choice[™]

Water Dance[®] Shower System

SYMMONS® Water Dance®

the smart choice™

Water Dance. A Moving Experience.

Water Dance multi-head shower systems elevate the simple shower to a revitalizing revelation. From the adjustable flow of the showerhead, to the convenience of the hand shower, to the luxury of the multiple body sprays, Water Dance surrounds you in pleasure.

Thanks to a flexible design and superior engineering, what was

once a luxury for the fortunate few now comes home to even the most modest bathroom. Because it's from

Symmons, you know Water Dance is made of the

finest materials and with the most rigorous

attention to detail. Like all Symmons products,

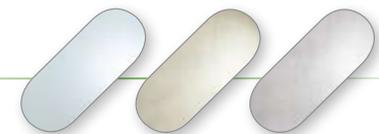

it's built to last, and guaranteed for the life of

the home* - a critical factor when you're

installing plumbing lines behind multiple

bathroom walls.

Symmons Water Dance® is available in these finishes:

Polished Chrome

Radiance® Satin Nickel (STN)

Radiance® Polished Nickel (PNL)

A Shower Experience Designed for You

Water Dance gives you design freedom even before it's installed, with independent components that let you place shower elements to fit the ergonomic needs of your family. With the diverter and adjustable sprays you can tailor every shower to your exact specifications. Tired? Dial up an invigorating spray. Tense? Take a long, slow, relaxing soak. Looking for something a little different? Mix and match the flows from the showerhead, hand shower and body sprays.

**Hand Shower with
Wall Cradle**

H303
3-Mode

H301
1-Mode (not shown)

Shower Safety and Comfort

To give your shower the ultimate in safety and comfort, every Water Dance® system features our unique High-Flo™ Pressure-Balancing valve. As the pioneers in anti-scald, pressure-balancing technology, nobody knows better than Symmons how to ensure that when someone in your household flushes a toilet, turns on a dishwasher or starts a load of wash, you won't be burned (or frozen out) by a sudden change of water temperature.

The High-Flo™ Pressure-Balancing Shower Valve

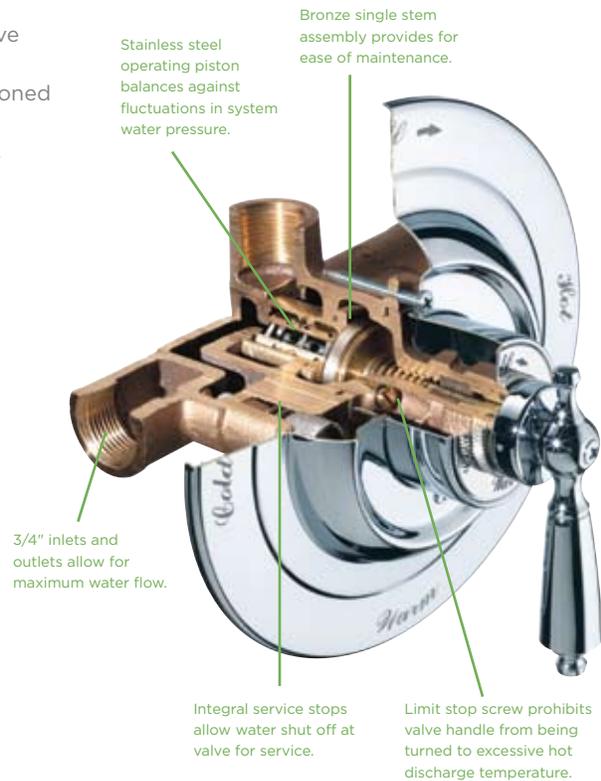

Pioneered by Symmons, the anti-scald, pressure-balancing valve provides a safe, comfortable shower by maintaining a proportioned mix of hot and cold water for any desired shower temperature.

The prime control unit is a hydraulic piston that automatically and continually balances the incoming hot and cold water pressures, even when the supply pressures change drastically.

Complete failure of the hot or cold water supply causes the piston to move to the extreme position, effectively shutting down water flow through the valve.

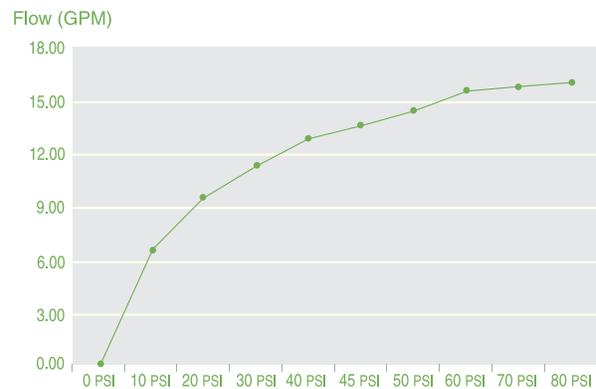

The Water Dance® Shower System maintains a flow of nearly 13 gallons per minute at 45 PSI

(performance may vary according to plumbing system).

Installation Factors

Water heater capacity, flowing water pressure, drain size and supply pipe diameter must be considered carefully when designing a Water Dance Shower System. Consult with your plumbing professional. Find out more at www.symmons.com, or call us at 1-800-SYMMONS for specifications and details.
