Pressure Relief Valve (PRV) Wall Faucet Upgrade Kits

Prevent bursting!

What is a PRV?

The Patented Pressure Relief Valve (PRV) prevents the faucet casing tube from bursting in freezing conditions even if a hose is unintentionally left on. The PRV releases at approximately 350 p.s.i.

RK-PRV Upgrades Available For Models Below:

Model 14

Model 17

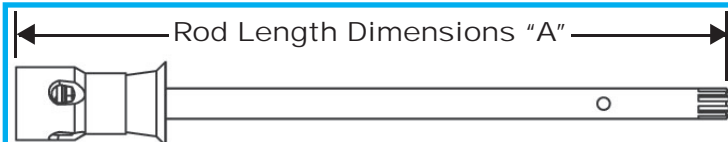

Model 22 - Produced before May 2008.

How to remove and determine what size operating rod to purchase?

To remove the operating rod from the faucet, shut off the water supply to the faucet and remove the handle and packing nut. Use the handle to turn the rod counterclockwise until the rod becomes disengaged from the valve seat. Use a small screwdriver to pry the packing loose. Pull rod out of the faucet. The rod may have a check valve that will add resistance to removal, however a swift pull will disengage it.

Wall Thickness	Overall Length	RK-PRV Kit
4	5 7/8"	RK-PRV-4
6	7 7/8"	RK-PRV-6
8	9 7/8"	RK-PRV-8
10	11 7/8"	RK-PRV-10
12	13 7/8"	RK-PRV-12
14	15 7/8"	RK-PRV-14
16	17 7/8"	RK-PRV-16
18	19 7/8"	RK-PRV-18
