

Applications

- Designed for low duty cycle applications where precise temperature controls and low pressure drop are required

Performance Features

- Designed for commercial and industrial applications
- Capable of high volume and high temperature applications at low duty cycle
- Fully modulating - Predictive control algorithm and diverse safety features ensures precise temperature control
- T&P not required per UL499 (check local codes)
- Thermo-Optical Sensor for infrared element monitoring
- Field programmable, updatable firmware, and adjustable

Optional Features (NEMA cabinet required)

- N4 (powder coated steel), N4X (304SS) N4X6 (316SS) enclosures
- Free standing legs
- Freeze protection for harsh climate, up to -30°F
- Non-fused or fused electrical disconnect
- GFCI
- Explosion proof – C1D2 Compliant, local certification required. Class Z purge and pressurization system provided with pressure switch for alarm controls. For classification other than C1D2 please contact the factory to discuss options.
- Siren and beacon - audible and visual alarm (C1D2 compliant when paired with explosion proof package)

Product Specifications

Min. Operating Pressure: 35 PSI

Max. Operating Pressure: 150 PSI

Optimum Operating Pressure: 60-90 PSI

U.S. Patent #'s: US20140023354 and US20140178057

Installation Requirements

- Properly sized water hammer arrestor
- Minimum 35 PSI dynamic pressure at inlet
- Sediment filter installed on inlet

Special Design Service

- Inquiries for units for unique applications are welcome. Call our Technical Service department at **1-800-543-6163**.
- Custom orders non-refundable

Suggested Specification

Tankless water heater shall be an Eemax SpecAdvantage model number AP_____.

Optional factory installation in a ____ (N4/N4X/N4X6) enclosure.

Enclosure to be fitted with the following features:

- ___ **FP** Freeze protection (-30°F)
- ___ **EDS** Non-fused disconnect
- ___ **FDS** Fused disconnect
- ___ **EP** Explosion proof (C1D2 compliant)
- ___ **GFCI** True RMS GFCI with digital display and reset
- ___ **SK** 24" legs for free standing applications
- ___ **RD** Remote display
- ___ **SB** Siren and Beacon
- ___ **DC** Dry contact
- ___ **ES** Emergency stop - push button

Tankless water heater must have water connections on the bottom, and be constructed with NSF 61 listed materials. Direct heating element to be non-ferrous, cartridge style, designed for field replacement. Tankless water heater to utilize a dual PID algorithm, actively managing power application to real-time system demand. Integrated flow meter capable of volumes in excess of 30 GPM drives predictive control algorithm. Water heater must be protected by redundant safeties. Redundant safeties to include thermo mechanical safety switches, infrared element monitoring via thermo optical sensors, and dual temperature monitoring via master control board. Tankless water heater user interface must have the following capabilities:

- Selectable display including Celsius/Fahrenheit, inlet temperature, outlet temperature, flow rate, and setpoint temperature.
- Capable of displaying flow rate in gallons per minute or liters per minute.
- Diagnostic features to include error and fault code display.
- Control board must maintain error/fault history of 9 events.
- Capable of factory coded temperature setting (max. and min.)
- Capable of firmware upgrades via USB port
- Capable of BMS integration - contact factory
- Compliant with ANSI Z358.1 tepid water without additional mixing or purge features (inlet temperatures must not exceed 100°F when selecting an EE or EFD option)

Suffix Definitions

- S** **Sanitation.** Shipped at 180°F with temp range of 100°F-190°F max.
- EE** **Emergency Eyewash.** Max. outlet temperature 90°F. Conforms to ANSI Z3581.1 tepid water without additional mixing valve. Shipped with display "Locked."
- efd** **Emergency Eye, Face & Drench.** Max. outlet temperature 90°F. Conforms to ANSI Z3581.1 tepid water without additional mixing valve. Shipped with display "Locked."

Note: Models with an EE or EFD suffix are not to be fed to a thermostatic mixing valve. If a thermostatic mixing valve is required, heater of non EE or EFD must be specified.

Note: Models without a suffix are set to a maximum temperature of 140°F if the turn on is greater than 1.5 GPM. Models with a 1.0 or 1.5 GPM turn on are limited to 120°F.

* Units with a 1.0 or 1.5 GPM turn-on are limited to 120°F only. Contact Eemax support for applications above 120°F.

† Temperature electronically limited to factory preset temperature.

"C" indicates evaluation and compliance to either Underwriters Laboratories (UL) or Intertek (ETL) under CAN/CSA-C22.2 No. 64/No. 88.

** Contact Eemax for applications requiring lower turn on.

Electrical configuration and requirements

All Eemax three phase units are custom made to order and as such, are non-returnable and non-refundable. Check your electrical supply, making sure all criteria for operating your Eemax water heater are met.

Eemax 600V, 480V and 208V Three Phase Units Delta Configuration

Requires: 3 Lives and 1 Ground (earth)

Unit Selection

Base Model (No Suffix)

All SpecAdvantage models are designed for low duty cycle applications where precise temperature controls and low pressure are required. Models without a suffix are set to a maximum temperature of 140°F if the turn on is greater than 1.5 GPM. Models with a 1.0 or 1.5 GPM turn on are limited to 120°F.

Suffixes:

- S Sanitation**
For applications that require high-temperature delivery. Units shipped at 180°F.
- EE Emergency Eyewash**
ANSI Z3581.1 tepid water for emergency eyewash stations
- EFD Emergency Eye, Face & Drench**
ANSI Z3581.1 tepid water for emergency eye, face, and drench showers

Select the best model based on your hot water requirements. You need a proportional amount of energy to heat the flow (GPM) needed for the application. The chart below shows a range of possible applications and the recommended unit size (kW).

NOTE: For simple calculation, kW reference is based on a 100% heater efficiency.

$$\text{kW Required} = \text{GPM} \times (\text{temp rise}/6.83)$$

GPM	TEMPERATURE RISE °F
