

HEAVY DUTY UNIVERSAL ROOF BRACE KIT

- The Universal Roof Brace Kit is designed to provide extra stability for the chimney system above roof line, and is required when the chimney extends 5 feet or more above the roof.
- One kit should be used for every 5' of chimney.
- Includes telescoping legs that adjust from 5'-9' and a support band that adjusts to fit chimneys from 5" to 8" ID.

Size	Product No.	Part No.	Pack
5" to 8" ID	0843900	HDRBK	1

ROOF BRACE KIT

- A Roof Brace Kit can be used whenever there is a need to stabilize the chimney above the roof level. The Roof Brace Kit should be used at a midpoint on the chimney. Braces adjust from 4' to 7-1/2'.

ROOF BRACE KITS REQUIREMENTS

up to 4'	None

7"	207440	7T-RBK	1
8"	208440	8T-RBK	1

WALL SUPPORT KIT - Now Supports 60 Vertical Feet at 2" from Wall

*12" and 14" Design not as illustrated and are non-adjustable.

NOTE: 5"-10" will allow for an adjustment of 2" to 6" from a vertical wall. 12" and 14" are non-adjustable at 2" from a vertical wall.

- The Type HT Wall Support Kit has been tested for use fully enclosed and has been designed in 5", 6", 7" and 8" sizes to carry up to 60' of height. The capacity of the larger sizes, 10", 12" and 14", is 40' of chimney.
- The Wall Support is intended for use with the Insulated Tee as an interior or exterior support where the chimney has a lateral connection. It is also useful where the pipe connection passes through a combustible interior or exterior wall.
- Braces may be fastened to the wall either above or below the plate for chimneys which penetrate through the wall.
