

## USE AND CARE

### ROCKER SWITCHES

Left rocker switch controls blower and right rocker switch controls light. (FIG. 14)

#### BLOWER SWITCH

-  Turns blower on to HIGH speed.
-  Turns blower OFF.
-  Turns blower on to LOW speed.

#### LIGHT SWITCH

-  Turns light ON.
-  Turns light OFF.

### CLEANING

Finish Keep your range hood clean using a mild detergent suitable for painted surfaces.

The aluminum filter should be cleaned frequently. Use a warm dishwashing detergent solution.

Clean all-metal filter using a non-phosphate detergent. Discoloration of the filter may occur if using phosphate detergents, or as a result of local water conditions - but this will not affect filter performance. This discoloration is not covered by the warranty. To minimize or prevent discoloration, hand wash filter using a mild detergent.

### FILTER REMOVAL

Remove filter by pulling on its plastic tab.

### LIGHT BULB REPLACEMENT

Replace the BXT Series range hood bulb using one LED light bulb (120 V, 7 W max., with GU10 base). Align the bulb leads with the small indentations located on the border of the lamp location on hood (see inset in FIG. 15), then install the bulb by placing the bulb leads into their grooves in the socket. NOTE: Do not fold the plate (grey part in FIG. 15) located in the light bulb housing. Gently push upwards and turn clockwise until secured. If desired, one shielded halogen bulb can also be used (GU10 base, 50 watts maximum).

### WARNING

**Do not touch lamps during or soon after operation. Burns may occur. In order to prevent the risk of personal injury, only install shielded halogen lamps. Also, never install a cool beam, a dichroic lamp, a lamp not suitable for use in recessed luminaires or identified for use in enclosed fixtures.**
